## RH190: Red Hat Command Line Skills

### **Duration: 3 days**

Develop the foundational skills needed to administer Red Hat® Enterprise Linux® without graphical tools.

### **Accessing the command line**

Access the command line locally and remotely; obtain administrative privileges.

### **Managing files from the command line**

Explore the Linux file system hierarchy; use path names; manage files and directories.

### **Getting help in a textual environment**

Access Linux documentation.

### **Intermediate command-line tools**

Use hard and symbolic links; archive and compress files, and send them to a remote system; use vim to edit text files.

### **Regular expressions, pipelines, and I/O redirection**

Use regular expressions to search for patterns; redirect output and use pipelines to combine commands.

### **Managing user accounts**

Manage local user and group accounts, and manage passwords.

### **Controlling access to files**

Manage file ownerships and permissions.

### **Managing processes**

Manage process scheduling.

### **Installing and managing software**

Manage software.

### **Managing installed services**

Manage installed services.

### **Installing Linux graphically**

Install a Linux workstation.

### **Managing virtual machines**

Manage virtual machines
